

New Enhancement!

Document Library Now Available on Your Client Dashboard

We are excited to introduce a new enhancement to your client dashboard — our **Document Library**.

This addition was designed to make it easier for you to access important information, streamline communication, and reduce the need for manual requests.

What's Included in the Document Library?

Communications

Stay informed with our latest updates and announcements. We encourage you to check this section regularly to ensure you're up to date with important information and changes.

User Guides

All user guides are now conveniently housed in one central location. While guides will continue to be available within their respective dashboard tabs, this section provides a comprehensive, easy-to-navigate resource.

Vendor Management Documents

Many of the documents required for vendor management are now readily available within this tab. This means fewer emails and faster access to the materials you need to support your processes.

This enhancement reflects our ongoing commitment to improving your experience and providing more efficient access to the resources you need.

If you have any questions, please reach out to Donna Rowe at drowe@stonehillgroup.com. Thank you for your continued partnership.
