

IMPORTANT ANNOUNCEMENT ABOUT STONEHILLS' CONTINUED EVOLUTION

You are an important client of **The StoneHill Group (TSG)** and we are pleased to share some exciting news that was announced today. **Sourcepoint**, a **Firstsource** company, has signed a definitive agreement to acquire our company and we anticipate the transaction to be closed by the end of 2021, subject to customary regulatory approval.

Inherent in this decision, TSG has been focused upon the benefits that this strategic transaction will offer to our clients and employees. Sourcepoint, headquartered in Palm Bay, Florida, is one of the nation's leading providers of outsourced mortgage services and solutions. Stonehill's expertise in Quality Control, Due Diligence and Fulfillment are a great complementary fit for Sourcepoint and strengthen its position as the premier provider of Originations, Servicing, Title & Post-Closing services in the US mortgage market. This combination will help us to continue to grow and deliver best-in-class results for our clients while simultaneously opening new services under an existing master services agreement.

Sourcepoint parent, Firstsource, is a rapidly growing organization with over 27,000 employees across the US, UK, India, and the Philippines. It serves industry leaders in Financial Services, Healthcare, and Communications, Media & Technology industries.

TSG's entire management team, our current organizational structure and your current operational, client services and sales contacts will remain the same.

During this transition, TSG is committed to providing the same high level of service to our clients that you've come to expect.

Please feel free to call me or your primary TSG contact with any questions you may have regarding this announcement and how it will affect your business.

To close, we'd like to thank you for your business and for the confidence that you have placed in TSG as your business partner. We look forward to continuing our relationship and being able to provide you with enhanced services in the Sourcepoint and TSG combination.

Kind Regards,

David Green
